DETAILED ACTION

Claims 1-40 have been examined.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-40 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims contain the limitation *calling program and callee program coexist within a single executable module but have different machine context organizations*. This limitation appears to be only briefly mentioned in the specification on page 22, lines 15-18 and is not described in such a manner as to allow one of ordinary skill in the art implement such a feature. Questions arise as to how this single module is able to execute on a particular machine if the module is in fact designed for multiple machine contexts. Clearly some of the instructions or data formats must not be executable on the particular machine, which would make the module inoperative. Therefore, enablement is lacking for this limitation.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2124

Claims 1-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1, 11, 21 and 22 and all their dependent claims are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are the steps pertaining to how the calling and callee programs are made to exist within a single executable module and communicate while the said programs are of differing machine context organizations. Furthermore, steps pertaining how the linkage service relates to the determining savearea step are lacking.

Examiner's Response

Applicant's arguments, see paper 5, filed 30 January 2003, with respect to claims 1-40 have been fully considered and are persuasive. The prior art rejection of the previous Office Action, paper 4, has been withdrawn.

This action is not made final.
